Declaration on Use of GAI (Generative Artificial Intelligence) Assistance

in relation to a hackathon project submission (to be completed individually by each team member, even for group projects)

I (student name), Yeong Sir Chung

@e.ntu.edu.sg (NTU email)

honestly and sincerely make the following declaration in relation to the following submission:

1. Event:	Learn to Hack: MATLAB Edition 2026 (Hackathon), 30 October 2026
2. Challenge:	MathWorks Hackathon: Predicting Building Energy Consumption
3. Judges / organisers:	Hackathon judging panel
4. Team:	Group 1 – Matrix Not Found (Yeong Sir Chung, Matthew Roberto, Rohit Panda)
5. Title of project submission:	Retrofit Radar: Predicting Building Energy Consumption with MATLAB github.com/Roh00t/MatrixNotFound · roh00t.github.io/MatrixNotFound

In relation to the foregoing I hereby declare that, in accordance with the hackathon rules, I have (check all that apply to **my own** contribution):

- ☐ i. Used GAI to assist in generating key ideas.
- ☐ ii. Used GAI to assist in generating first drafts of text (e.g. documentation, slides, Devpost text).
- ☐ iii. Used GAI to refine syntax and grammar.
- ☐ iv. Used GAI to assist in writing, debugging or reviewing code and analysis, which I reviewed, ran and verified myself.
- ☐ v. Used GAI to generate media assets (e.g. 3D models, images or video).

Or

- ☐ vi. Not used GAI assistance in any way in my contribution to this project.

Team disclosure: GAI tools used in this project

- **Claude Code (Anthropic):** MATLAB pipeline code, validation design, dashboard and 3D-simulator web code, documentation, and presentation editing.
- **AI coding agent in Visual Studio Code:** parts of the independent cross-check pipeline, tests and documentation.
- **Gemini (Google):** planning advice and prompt drafting.
- **Meshy AI:** generated the 3D models of The Hive and The Arc used in the simulator.

All AI-assisted code was run and verified in MATLAB (unit tests and a clean-room rerun that reproduced the submission byte for byte).

I also declare that I have:

a. Fully and honestly submitted the digital paper trail: the project's complete Git commit history in the public repository;

b. Acknowledged GAI assistance wherever it was used, in the project documentation (GUARDRAILS.md, section "Working with AI assistants"; README credits) and on the simulator page for the AI-generated 3D models; and

c. Apart from the foregoing notices, the submission is the team's own work, and I have personally reviewed the parts I contributed.
